

## **New Correctional Facility for Women Construction Update for March 3, 2017.**

We have completed construction weeks #47, #49 & #49 of the new Correctional Facility for Women in Concord.

As the weather begins to change, the earthwork contractors will be coming back to complete connections to the City sewer lines, final grading of the rear parking areas, grading of the courtyard and perimeter road and begin work on fencing.

Interior work is a bit of organized chaos right now where more than ten trades work simultaneous in the same area. Some days running multiple scissor lifts (below) looks more like a synchronized swim competition than heavy construction.

The project remains on track and within budget.
